

625A ARC TRAINER

LOWER BODY CROSS TRAINER

A commercial cross trainer designed for the lower body with the patented Arc Trainer design that gives fast fitness results. Train for strength, power and weight loss on one machine. The Cybex 625A Arc Trainer® offers broad incline and resistance ranges to do the work of three machines in one. At the lower incline levels, the “glide” is a cross-country skier. In the mid-range levels, the motion is a “stride” (like an elliptical except with proper positioning). At the high levels, it’s the “climb” of a stepper or climber. Research shows that the Cybex Arc Trainer burns more calories than any other cross trainer or elliptical tested.

USER-FRIENDLY TECHNOLOGY
